

Dyna-Cut

- Designed for use with flexible dies
- Custom dies perform multiple cuts, slits, slit-scores, kiss cuts, perforations, and window punches
- High speed output of up to 6,000 cycles per hour
- Fast and efficient die changes

Martin Yale’s Dyna-Cut is an affordable rotary die cutter system producing top quality pieces from custom flexible dies.

In an industry competing to fulfill customer demands for unique and differentiating print finished pieces you will find rotary die cutters providing their worth. Rotary die cutting provides print service centers with immense flexibility in the design of finished pieces which can be specifically tailored to the customer’s request. Additionally, with the low cost and quick turnaround time for the flexible dies, finished pieces can be delivered to the consumer in a matter of days.
