

Inflatable Air  
Cushion Packing  
Material System

Cost Saving Alternative to  
Packing Peanuts

**WiAIR™ 200**

**California Law AB 3025 Begins Ban on Loose Fill Polystyrene Packing Peanuts, Many States to Follow:**

Starting on January 1, 2012 in California, all polystyrene loose packaging (i.e. packing peanuts) must contain at least 60 percent post-consumer recycled material. The number will increase to 80% by 2014 and 100 percent by 2017.

According to the Official All Green Electronics Recycling Blog; "Polystyrene loose fill packing peanuts sit in landfills indefinitely and cannot be used to make other polystyrene (Styrofoam) products. When polystyrene loose fill packing peanuts are thrown away, it can take hundreds of years to decompose. It harms the digestive tracts of animals, releases toxic chemical into local water supplies, and can be carcinogenic."

The WiAir Inflatable Air Cushion Packing Material Systems is a practical replacement for loose fill packing peanuts and is designed for any business with a pack-and-ship operation needing to conserve space. The WiAir was engineered for the cost-conscious business needing to securely pack customer orders and eliminate the storage space occupied by bulky packing materials such as peanuts and craft paper rolls. The WiAir 200 produces air cushions made of environmentally friendly biodegradable low density polyethylene film that are recyclable and can be produced in one cubic foot of space as they are needed.

**Save; time, space and money....**

- Produce 5" to 11" sized air cushions on demand to pack more in less time.
- With no potential for spillage, the WiAir cushions are clean, neat, recyclable and keep clean-up time to a minimum.
- Easy operation; select cushion size and length of film run and push start. The WiAir does the rest!
- Produce all the transparent air-filled cushions you need in about the space of a postage meter. 1 cubic foot footprint. (L 20" x W 13" x H 7")
- One (1) roll of WiAir film equals seven (7) bags of packing peanuts.
- Produce air cushions in the sizes you need, just-in-time.
- Lightweight and more durable air cushions offer greater protection and at 50% less cost than traditional polystyrene packing peanuts.
- 5" to 11" size air cushions can be produced from the same film roll, no need to buy different film rolls to make different size air cushions.
- The WiAir inflatable air cushion packing material system will pay for itself by saving space and lowering packing material costs.

# Inflatable Air Cushion Packing Material System

## Key Features & Benefits:

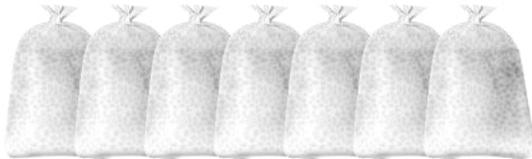

- 1. Cost saving alternative to packing peanuts; 50% material cost savings
- 2. Space savings; 1 roll of WiAir film produces 50 cubic feet of packing material
- 3. Easy to operate; you select the size of air cushion you need and how many you need, WiAir does the rest
- 4. Table-top portability; at 33 lbs. the WiAir can be placed anywhere you need it and occupies about the same space as a postage meter
- 5. Use the WiAir air cushions for:
  - a. Void-fill in cartons
  - b. Cushioning & protection
  - c. Blocking & Bracing contents
- 6. 100% environmentally friendly

**1 roll of WiAir film equals 7 seven cubic ft. bags of polystyrene packing peanuts!!!**

## TECHNICAL SPECIFICATIONS

Maximum speed:	3.3 feet/minute
Air supply:	Self-contained compressor
Flexibility:	Set air cushion length on-demand: 3 to 328 feet.
Accessories:	Slide cutter
Cushion sizes:	8" inches in width, 5" – 11" in length
Film thickness:	1.6 mils
Film roll length:	328 feet
Power supply:	110v
Machine dimension:	L 20" X W 13" X H 7"
Machine footprint:	1 cubic foot
Net weight:	33 lbs.
U.S. Patent Number:	US 7,398,633 B1

PE-LD
